PLEASE NOTIFY US IMMEDIATELY OF CHANGES TO YOUR CONTACTS

Risk: The possible presence of cereulide (toxin) in the products listed above.

Cereulide is a toxin produced by some strains of *Bacillus cereus*. Cereulide is highly heat stable meaning it is unlikely to be deactivated or destroyed by cooking, or when making the infant milk according to NHS guidelines. If consumed it can lead to rapid onset of symptoms.

Symptoms caused by this toxin include nausea, vomiting and abdominal cramps.

Our advice to consumers:

Aptamil

If you have bought any of the above products do not feed them to babies. Instead, return them to the shop where you bought them for a full refund with or without a receipt. Customers who have already purchased these products can go to [aptaclub.co.uk](https://www.aptaclub.co.uk) to check which batches are affected. For further information, contact the Aptamil Careline team on 0800 996 1000 or at <https://www.aptaclub.co.uk>

Cow & Gate

If you have bought any of the above products do not feed them to babies. Instead, return them to the shop where you bought them for a full refund with or without a receipt. Customers who have already purchased these products can go to [cgbabyclub.co.uk](https://www.cgbabyclub.co.uk) to check which batches are affected. For further information, contact the Cow & Gate Careline team on 0800 977 8880 or at <https://www.cgbabyclub.co.uk>

Even if you have not identified ill-health in your baby as a result of consumption of any of these products, it is essential to stop using it. If the infant formula was prescribed by a health professional for your infant, consult a pharmacist or other medical professional before changing formula.

If you have fed any of these products to a baby and have any concerns about potential health impacts, you should seek advice from healthcare professionals, using the most appropriate route depending on where you live, (i.e. visit your GP, call NHS 111).
