Supporting people with eating, drinking and swallowing difficulties (Dysphagia)

Guidance
Dysphagia is a complex and multi-dimensional issue that requires specific skills and expertise to ensure the best possible outcomes for people experiencing care.

We have produced this guidance to:
- highlight good practice
- help inspectors identify signs where a care service’s practice can be better and support them to improve
- support care providers to better understand and implement good quality care.

This document does not provide specific guidance for managing dysphagia in care homes. It does not evaluate competence or replace dysphagia training.

The Royal College of Speech and Language Therapists (RCSLT) has guidance available at [https://www.rcslt.org/-/media/Project/RCSLT/dysphagia-in-care-homes.pdf](https://www.rcslt.org/-/media/Project/RCSLT/dysphagia-in-care-homes.pdf)

RCSLT, the Care Inspectorate and Scottish Care expect that those not directly involved in hands-on care, such as care inspectors, managers and chefs should achieve a minimum of Level 1 Dysphagia Competence (dysphagia awareness).

We expect care staff working directly with people who have swallowing problems to achieve a minimum of Level 2 of the Eating, Drinking and Swallowing Competency Framework provided by the Royal College of Speech and Language Therapists.

Inspectors should refer to descriptions of IDF levels 1 and 2 to ensure they are familiar with their requirements.

Please consult your local speech and language therapy department for dysphagia training opportunities in your area. For more information and updated guidance and learning about dysphagia visit: [https://www.rcslt.org/speech-and-language-therapy/clinical-information/dysphagia](https://www.rcslt.org/speech-and-language-therapy/clinical-information/dysphagia)

### Key observation areas for inspectors

<table>
<thead>
<tr>
<th>What is important to the person with difficulties eating, drinking or swallowing?</th>
<th>Examples of good practice</th>
<th>Examples of weak practice where improvement is required</th>
</tr>
</thead>
</table>
| General wellbeing | • Meals/snacks are offered at all times of day to ensure the person is awake and alert.  
• Individual food and drink choices are known and respected.  
• Person is alert and enjoying mealtimes.  
• Staff aware of potential consequences of dysphagia. | • Person is not offered alternative options if unwell or unable to eat/drink their usual menu.  
• Person’s likes/dislikes and dietary requirements not known or respected.  
• Staff do not know/understand underlying conditions that impact on eating and drinking, e.g. UTIs, fatigue, pain, mental illness. |
| Oral infection control | • Clean, moist and healthy mouth.  
• Person is supported with oral hygiene thoroughly a minimum of twice daily, at morning and night-time.  
• Oral risk assessment updated every six months.  
• Loose fitting dentures remain for cosmetic purposes but removed for eating and drinking if person wishes.  
• Dentures removed and cleaned overnight.  
• Regular oral health checks for all patients including those without teeth. | • Service is aware of current weight and/or signs of weight loss.  
• Staff wrongly believe that people without teeth do not require mouth cleaning.  
• Dentures poorly fitting.  
• Absent, poor or infrequent oral hygiene.  
• Person has untreated oral thrush.  
• Person has a dry, crusty and/or dirty mouth, bad breath.  
• No staff support for person who is unable to thoroughly mouth clean.  
• No evidence of oral health check-up. | • Support people with eating, drinking and swallowing difficulties (Dysphagia) |
| Environment | • Person supported in quiet room free of distractions and noise according to individual needs.  
• No music, or gentle background music suitable to preferences of the person experiencing care.  
• Person shares a table with friends, people they like.  
• Person appears settled in their environment of choice. | • Radio/TV playing loudly.  
• Too many visual distractions, e.g. people moving around.  
• Overpowering smells, e.g. bleach, urine, smells of cigarettes/perfume, affect appetite.  
• Staff member turns away to talk to others or gets up and does other tasks in the middle of supporting eating/drinking. | • Oral infection control |
| Time | • Person eats independently but staff member knows when and how to give extra support if the person tires as the meal progresses.  
• Person offered small meals and snacks often throughout the day if they cannot manage large meals. | • Food gets cold because person is not supported/encouraged to eat.  
• Person takes over an hour to eat.  
• Person not given alternative options at different times if they are unable to eat at set mealtimes. | • Environment |

Supporting people with eating, drinking and swallowing difficulties (Dysphagia)
| Positioning | Staff positioned at person’s eye level.  
Person comfortable and supported upright in their chair with feet in contact with footplates/floor. | Staff member stands/hovers over person or feeds from behind.  
Staff don’t know best position or side to support.  
Staff position uncomfortable.  
Supporting staff member |
| Supporting people with eating, drinking and swallowing difficulties (Dysphagia) |
|---|---|
| **Person’s changing posture or position assessed by physiotherapy.** | turns away and moves around during meal.  
- Person slouching or leaning to one side in their chair. |
| **Equipment** | **Person struggling with independence has not been assessed for alternative equipment by a suitable health professional.**  
- Person uses another person’s bespoke cup/spoon without health professional assessment. |
| - Suitable adapted forks, spoons, cups, placemats in place and used appropriately, e.g., person with dementia given colour contrasting equipment. | |
| **Sensory needs** | **Staff unaware that person wears glasses.**  
- Hearing aids do not work or are not in.  
- Supporting staff member doesn’t tell person that spoon is approaching mouth.  
- Staff member approaches person too quickly. |
| - Glasses on, hearing aids checked and working properly.  
- Staff describe food/drink and offer person a taste and smell prior to starting meal. | |
| **Medication and prescribed products** | **All medications given in liquid form although problem with swallowing only one tablet.**  
- Side effects of prescribed products ignored, e.g., pneumonia, dehydration, UTIs.  
- Person on multiple medications without review. |
| - If a person has problems swallowing a particular shape of tablet, different ways of taking it have been discussed with speech and language therapy and/or pharmacist.  
- Medication and prescribable products regularly reviewed. | |
| **What is the person eating?** | **Person not told what unidentifiable texture-modified food they are eating.**  
- Poor presentation of food.  
- All food has been mashed or pureed although person only struggles with one type of food or texture/person has not had a robust dysphagia assessment.  
- No middle ground explored by staff or SLT, e.g. goes from normal diet to mashed diet or puree. |
| - Person offered softer options only for food that causes difficulty.  
- Staff know and respect cultural and dietary requirements.  
- Person enjoys and engages in process of eating and drinking.  
- Meal has recognisable different components even if texture modified rather than all mashed together.  
- Person who receives tube feeding is still supported with food and fluid orally according to their individual care plan. |

**Working Group**

Karen Fraser - Team Manager, Care Inspectorate

Kim Hartley-Kean - Head of Scotland Office, Royal College of Speech & Language Therapists

Rebecca Kellett - Speech & Language Therapist East & Mid Lothian Adult Community Speech & Language Therapy Service specialising in dysphagia management

Joyce Murray - Improvement Support Team Manager, Care Inspectorate

Rene Rigby - Independent Sector Lead, Scottish Care

Sara Stewart – Inspector, Care Inspectorate

Particular thanks to:

Tracy Lazenby-Paterson - RCSLT Accredited Advisor (Dysphagia); NHS Lothian Speech & Language Therapist for her knowledge, expertise, time and professionalism in the compilation of this guidance.

This guidance draws on work previously compiled by Helen Moores-Poole, Advanced Speech & Language Therapist, NHS Dumfries and Galloway Adult Service, IDEAS Team (Interventions for Dementia, Education, Assessment & Support).
